✦ Top Rated Plus on Upwork • ✓ 100% Job Success

ABOUT

Senior iOS engineer with 10 years in software, 9 of them shipping mobile apps — from fintech at scale (GCash) to US startups and self-published App Store apps. Clean architecture, testable code, and end-to-end delivery from first commit to App Store release — now working AI-first, with LLM features in production and AI agent teams that take products from ticket to QA.

EXPERIENCE

iOS Engineer

December 2025 – June 2026

Nmblr, Inc.

Contract · Philippines — Remote

- Integrated the TrustArc SDK with Google Consent and recategorized Braze events for privacy compliance
- Built Drive-Thru ordering end to end (data layer, cart, option-selection UI) using Clean Architecture
- Built cancellation logic for scheduled pickups past reward expiry and coupon-eligibility rules
- Shipped favorite locations, deep links to store pages, and real-time credit-card brand detection
- Removed unsafe force-unwraps and centralized scattered constants to reduce crash risk

iOS Engineer

January 2024 – November 2025

Milagro

Freelance via Upwork · United States — Remote

- Built GitHub Actions + Docker CI/CD so QA could generate Firebase and TestFlight builds on their own
- Led a rewrite of the networking layer from legacy callbacks to async/await with Moya, custom plugins, unified error handling, and refresh-token handling
- Introduced dependency injection with Factory, CoreData repositories, and XCTest unit tests
- Resolved critical WebSocket issues and integrated Combine for a more reliable real-time experience
- Set code-quality standards — SwiftLint, SwiftFormat, build schemes, and PR review guidelines — and diagnosed and patched a crash in a third-party SDK (Microsoft Clarity)

iOS Engineer

January 2024 – February 2024

Studio

Freelance via Upwork · United States — Remote

- Built a video player with picture-in-picture and progress saving, a Tinder-style card UI, and a gesture sidebar
- Fixed a major CPU/memory issue in image processing; built Spotify-style dominant-color backgrounds

iOS Engineer

June 2021 – December 2023

CircleIn

Freelance via Upwork · United States — Remote

- Built a Discord-style community chat with reactions, image/file uploads, and optimistic UI updates
- Built an interactive onboarding flow that helps students find study groups by shared interests
- Developed flashcard games (Match Magic, Quiz Yourself) and a course-feedback feature for professors
- Refactored most of the codebase for maintainability and performance, adding unit tests

iOS Engineer

December 2018 – June 2021

Globe Fintech Innovations (Mynt) — GCash

Full-time · Philippines — On-Site

- Built biometric login (Touch ID / Face ID), Upload-QR payments, and Saved Billers for Bank Transfer
- Integrated a mini-program SDK letting partners run their apps inside GCash and accept payments securely
- Implemented a CDP SDK for in-app ads; resolved critical production issues and App Store rejections
- Reviewed code, added unit tests, debugged with Charles Proxy, and gated rollouts with Remote Config

Mobile Engineer

August 2017 – August 2018

TAP Services, Inc.

Full-time · Philippines — On-Site

- Led two junior engineers — one on the Objective-C iOS app, one on React Native
- Started a React Native app from scratch, setting up its structure and Redux state management
- Handled certificates, provisioning, and App Store releases; automated builds with App Center

Junior Web Developer

August 2016 – August 2017

Smart Communications, Inc.

Full-time · Philippines — On-Site

- Built a reporting feature with charts, graphs, and server-side pagination in JavaScript
- Delivered bug fixes and change requests for C# / ASP.NET Web Forms apps

PROJECTS

Quickworm — AI book-summary app App Store ↗

- Re-architected AI summaries onto Firebase AI Logic (Gemini) with App Check and remotely configured prompts, retiring a hosted proxy server and cutting infrastructure cost to $0

SwiftUI · MVVM · Firebase AI Logic (Gemini) · App Check · Remote Config · CoreData · AdMob

Moneta — Budget Tracker — Expense logging and daily spending · 5.0★ on the App Store App Store ↗

SwiftUI · SwiftData · Clean Architecture · Factory · WidgetKit · Firebase · IAP · Offline Sync

EZman — Food-delivery platform; led the customer and rider apps Customer app ↗ Rider app ↗

UIKit · MVVM · RxSwift · Moya · PubNub · Firebase · Google Maps · Push Notifications

Also on the App Store: Bubble Pop, Metronome, First Words for Baby, Dice Roller — SwiftUI, StoreKit, AdMob

AI AGENT WORKFLOWS

Kaha — Point-of-sale app for Filipino small businesses (in development)

- As product owner, designed a six-agent Claude Code team (orchestrator, Jira sprint manager, schema sync, parallel mobile/backend agents, verifier) that takes tickets from Jira to Ready for QA

App Factory — Agent pipeline for native iOS apps

- Designed a nine-agent team that takes a SwiftUI app from idea, ASO, UX, and icon through StoreKit 2 and compliance review to a signed TestFlight build; 4 apps submitted for App Store review

SKILLS & EDUCATION

LANGUAGES	Swift, Objective-C, JavaScript, C# / .NET
IOS	SwiftUI, UIKit, Combine, async/await, RxSwift, CoreData, SwiftData, StoreKit, WidgetKit, WebSockets
SERVICES	Firebase, Moya, PubNub, AdMob, React Native
AI	Firebase AI Logic (Gemini), OpenAI API, LLM integration, Claude Code agent teams
TOOLS	Git, GitHub Actions, Docker, Fastlane, SPM, CocoaPods, SwiftLint, XCTest
PRACTICES	MVVM, Clean Architecture, Dependency Injection, Figma, Jira / Linear / Trello, Public speaking
EDUCATION	BS in Information Technology — Central Luzon State University, 2011 – 2016
