ABOUT

iOS engineer with 9+ years in software and 8+ shipping iOS apps — from fintech at scale (GCash) to a portfolio of self-published App Store apps. Experienced with clean architecture and testable code, with a track record of shipping apps end-to-end — from first commit to App Store release.

EXPERIENCE

iOS Engineer

December 2025 – June 2026

Nmblr, Inc.

Contract · Philippines — Remote

- Drove privacy compliance by integrating the TrustArc SDK with Google Consent callbacks and recategorizing Braze event tracking
- Delivered Drive-Thru ordering end to end — data layer, cart, and option-selection UI — following Clean Architecture
- Built order-cancellation logic for scheduled pickups past reward expiration and enforced coupon-eligibility rules to block invalid applications
- Shipped Add-to-Favorite locations, deep-link navigation to store pages, and real-time credit-card brand detection
- Hardened the codebase by eliminating unsafe force-unwraps and centralizing scattered constants, reducing crash risk and easing maintenance

iOS Engineer

January 2024 – November 2025

Upwork - Milagro

Freelance · United States — Remote

- Built a CI/CD pipeline with GitHub Actions and Docker, letting QA generate Firebase and TestFlight builds independently
- Led a rewrite of the networking layer, migrating from legacy callbacks to async/await with Moya, custom plugins, and unified error handling
- Implemented dependency injection with Factory, CoreData repositories, and unit testing with XCTest
- Resolved critical WebSocket issues and integrated Combine for a more reliable real-time experience
- Established code-quality standards — SwiftLint, SwiftFormat, multiple build schemes, and PR review guidelines; implemented dark mode, EventBus, network monitoring, and refresh-token handling
- Diagnosed and patched a crash in a third-party library (Microsoft Clarity)

iOS Engineer

January 2024 – February 2024

Upwork - Studio

Freelance · United States — Remote

- Developed a custom video player with playback controls, picture-in-picture, and progress saving
- Built a Tinder-style card layout for browsing peers and a custom sidebar with interactive gestures
- Created a component generating background colors from an image's dominant colors (Spotify-style)
- Identified and fixed a major CPU/memory issue caused by image processing
- Systematized the design system and ensured pixel-perfect implementation of Figma designs

iOS Engineer

June 2021 – December 2023

Upwork - CircleIn

Freelance · United States — Remote

- Developed a community chat feature similar to Discord, with reactions and image/file uploads
- Built an interactive onboarding feature helping students find study groups by shared interests
- Developed flashcard games (Match Magic, Quiz Yourself) and a course-feedback feature for professors
- Improved chat experience with optimistic UI updates and bug fixes
- Refactored the majority of the codebase for improved maintainability and performance; added unit tests

iOS Engineer

December 2018 – June 2021

Globe Fintech Innovations (Mynt) — GCash

Full-time · Philippines — On-Site

- Developed biometric login (Touch ID / Face ID) and an Upload-QR feature for payment transactions
- Built the Saved Billers feature for Bank Transfer
- Incorporated a mini-program SDK letting partners showcase apps inside GCash and integrate securely for payments
- Implemented a CDP SDK for in-app ads; resolved critical production issues and App Store rejections
- Conducted code reviews, added unit tests, and refactored to improve testability
- Debugged network issues with Charles Proxy and managed feature rollouts with Firebase Remote Config

Mobile Engineer

August 2017 – August 2018

TAP Services, Inc.

Full-time · Philippines — On-Site

- Started a React Native project from scratch, establishing the initial project structure and Redux state-management patterns
- Managed app schemes, certificates, and provisioning profiles for TestFlight and App Store deployment; automated builds with Microsoft App Center
- Implemented bug fixes and change requests for an Objective-C iOS app

Junior Web Developer

August 2016 – August 2017

Smart Communications, Inc.

Full-time · Philippines — On-Site

- Built a reporting feature with charts, graphs, and server-side pagination using JavaScript
- Implemented bug fixes and change requests for web apps using C# and ASP.NET Web Forms
