✦ Top Rated on Upwork • ✓ 100% Job Success

ABOUT

Senior iOS engineer with 10 years in software and 9 in mobile, including over 4 years with US companies. Builds features from idea to release and leaves codebases cleaner, better tested, and easier to change. Now building products faster with AI agents.

EXPERIENCE

iOS Engineer

December 2025 – June 2026

Nmblr, Inc.

Contract · Philippines — Remote

- Built the Drive-Thru ordering flow, from menu options to cart, using Clean Architecture
- Made the app privacy-compliant by adding a consent manager and restructuring analytics
- Added rules that reject invalid coupons and cancel pickups when their rewards expire
- Shipped favorite stores, deep links to store pages, and instant card-brand detection at checkout
- Reduced crash risk by removing unsafe code across the app

iOS Engineer

January 2024 – November 2025

Milagro

Freelance via Upwork · United States — Remote

- Led the networking rewrite from callbacks to async/await, with unified error handling
- Moved sign-in into a dedicated service with Keychain storage and automatic token refresh
- Introduced dependency injection and unit tests, making the codebase safer to change
- Set up CI/CD so QA could test new builds without waiting on developers
- Defined the team's code-quality standards, from automated style checks to code-review guidelines
- Fixed critical WebSocket issues to keep real-time features reliable
- Traced and patched a crash inside a third-party analytics SDK

iOS Engineer

June 2021 – December 2023

CircleIn

Freelance via Upwork · United States — Remote

- Built a Discord-style community chat that feels instant, using optimistic UI updates
- Refactored most of the codebase and added tests, making the app faster and easier to maintain
- Built onboarding that matches students to study groups by shared interests
- Added flashcard games and a course-feedback tool for professors

iOS Engineer

December 2018 – June 2021

Globe Fintech Innovations (Mynt) — GCash

Full-time · Philippines — On-Site

- Integrated a mini-program platform that lets partners run their apps inside GCash and accept payments
- Built Face ID / Touch ID login, with credentials kept in the Keychain
- Added QR payments from uploaded images and saved billers for bank transfers
- Resolved critical production issues and App Store rejections
- Reviewed code, added tests, and rolled out features gradually behind feature flags

Mobile Engineer

August 2017 – August 2018

TAP Services, Inc.

Full-time · Philippines — On-Site

- Led two junior engineers across the iOS and React Native apps
- Started a React Native app from scratch, setting up its architecture and state management
- Managed App Store releases and set up automated builds

Junior Web Developer

August 2016 – August 2017

Smart Communications, Inc.

Full-time · Philippines — On-Site

- Built a reporting feature with charts and paged results
- Maintained and improved web apps built on C# / ASP.NET

PROJECTS

Quickworm — AI book summaries, quick or chapter by chapter App Store ↗

- Built it from scratch, replaced its paid server with Firebase AI Logic, and relaunched it in 2026 with subscriptions

SwiftUI · MVVM · Firebase AI Logic (Gemini) · App Check · Remote Config · CoreData · StoreKit 2

Moneta — Budget tracker that works offline and syncs across devices · 5.0★ on the App Store App Store ↗

SwiftUI · SwiftData · Clean Architecture · Factory · WidgetKit · Firebase · IAP · Offline Sync

EZman — Food-delivery platform Customer app ↗ Rider app ↗

- Led the customer and rider apps

UIKit · MVVM · RxSwift · Moya · PubNub · Firebase · Google Maps · Push Notifications

BUILDING WITH AI

Kaha — Point-of-sale app for small Filipino stores · Product owner

- Set the product and technical direction, including Clean Architecture and an offline-first design
- Designed a team of AI agents that plans, builds, and tests each feature, then hands it to QA

App Factory — AI agents that build iOS apps

- Designed a team of AI agents that takes an app from idea to App Store
- Shipped Dice Roller, Metronome, First Words for Baby, and Bubble Pop

SKILLS & EDUCATION

LANGUAGES	Swift, Objective-C, JavaScript, C# / .NET
IOS	SwiftUI, UIKit, Combine, async/await, RxSwift, CoreData, SwiftData, StoreKit, WidgetKit, WebSockets
SECURITY	Keychain, LocalAuthentication (Face ID / Touch ID), Sign in with Apple, consent management
SERVICES	Firebase, Moya, PubNub, Braze, TrustArc, AdMob, React Native
AI	Firebase AI Logic (Gemini), OpenAI API, LLM integration, Claude Code agent teams
TOOLS	Git, GitHub Actions, Docker, Fastlane, SPM, CocoaPods, SwiftLint, XCTest
PRACTICES	MVVM, Clean Architecture, Dependency Injection, Figma, Jira / Linear / Trello, Public speaking
EDUCATION	BS in Information Technology — Central Luzon State University, 2011 – 2016
